Education

Aug 2024 – May 2028	National University of Singapore Bachelor of Computing (Honours) in Computer Science - GPA: 4.7/5.0 (First Class Honours) - Minor: Entrepreneurship - Awards: Science and Technology Undergraduate Scholarship, Dean's List AY2025/2026 Semester 2, NOC Malaysia 2026	Singapore
---------------------	---	-----------

Work Experience

May 2026 - Present	Sonicboom Solutions Sdn Bhd <i>Software Engineer Intern</i> - Designed and implemented a web-based SSRS reporting system with caching to optimize report parameter loading from snapshots - Automated SSL/TLS certificate renewal workflows, improving server security and reducing manual maintenance overhead - Explored integration of AI-assisted tools (e.g., Replit AI) to prototype UI redesigns and modernize legacy product interfaces	Malaysia
Jan 2026 – May 2026	National University of Singapore <i>Undergraduate Teaching Assistant</i> - Facilitated weekly labs on object-oriented programming, functional programming and software engineering principles in Java - Reviewed 20+ students' code weekly with feedback on design & correctness	Singapore
Jun 2025 – Aug 2025	Edpulse (Subsidiary of XSEED Education Pte Ltd) <i>AI Research Intern</i> - Built a production chatbot using Ollama and Streamlit for querying and interacting with student academic reports - Implemented a RAG pipeline with LangChain and ChromaDB with memory-enabled dialogue for context-aware multi-turn interactions - Developed a multi-agent LLM system that analyzes student behaviour through AI conversations	India

Projects

Wavelength: Co-Living Management App

- Designed and developed a full-stack, cross platform co-living management for iOS and Android using React Native and TailwindCSS, creating intuitive UI/UX for roommate collaboration and tracking
- Built secure authentication and real-time database syncing with Appwrite backend, leveraging TanStack Query for efficient queries to minimize reads/writes, enhancing app performance
- Tech Stack: Javascript, React Native, TailwindCSS, TanStack, Appwrite, Expo

Project Sothea

- Contributed to the development and maintenance of an offline-first asset mapping platform for medical and disaster-readiness field teams, supporting geospatial data collection and assessment workflows.
- Enhanced local SQLite storage, backend APIs, and synchronization mechanisms to ensure reliable operation in low-connectivity environments.
- Tech Stack: React Native, Expo, SQLite, Drizzle ORM, Node.js, PostgreSQL, Redis, AWS S3, Docker.

Skills

Languages: Java, Javascript, Typescript, C#, Python, HTML, CSS, C, Rust

Frameworks & Libraries: React, React Native, Expo, Node.js, Express.js, Vue.js, Flask, .NET, WPF, Tailwind CSS

Cloud, Databases & DevOps: AWS, Docker, Kubernetes, PostgreSQL, SQL Server, MongoDB, Appwrite, Git

AI & Data: OpenAI API, Hugging Face, ChromaDB, LangChain, RAG Pipelines

Software & Tools: Figma, Android Studio, Xcode, Blender, Microsoft Office, Canva
